

PMMA block

Product name: Dental PMMA block
Model: 98mm/89mm/95mm
Certificate: CE
Delivery date: 7-10days
Supply capacity: 10,000 per month
After-sales: Return and Replacement support
Customized: support
Applicable system: Open/Zirkonzahn /Amann Girrbach system

Product description:

We offer PMMA discs designed for CAD/CAM milling machine.

We have Single-layer PMMA , Multilayer PMMA and Elastic PMMA block.

The diameter is 98mm ,95mm or 89mm as request, thickness are 10, 12, 14, 16, 18, 20 and 25mm, 30mm

PMMA Ceradirect PMMA, an acrylic is suitable for long-term temporary restorations.

Ceradirect PMMA is available as monochromatic blank and transparent blank and as a multilayer with shade gradient from dentine to incisal.

A-D shades of PMMA blanks ensure high-end aesthetics and reliable

Conventional cutters and trimmers can be used for preparation.

PMMA temporary restorations can be fabricated fully anatomically and can also be veneered with conventional crown and bridge resins.

They are suitable for check-ing the fit and functionality of the actual restoration before it is finished, whereby the tooth-coloured material increases the acceptance of the try-in.

Parameter:

Items	PMMA
Type	Single-layer ,Multilayer,Elastic
Thickness	10mm-30mm
System	Roland /Sriona/ VHF /Wieland /

	Arum /Amann /zirkozahn/open milling system etc.
--	---

Physical characteristics:

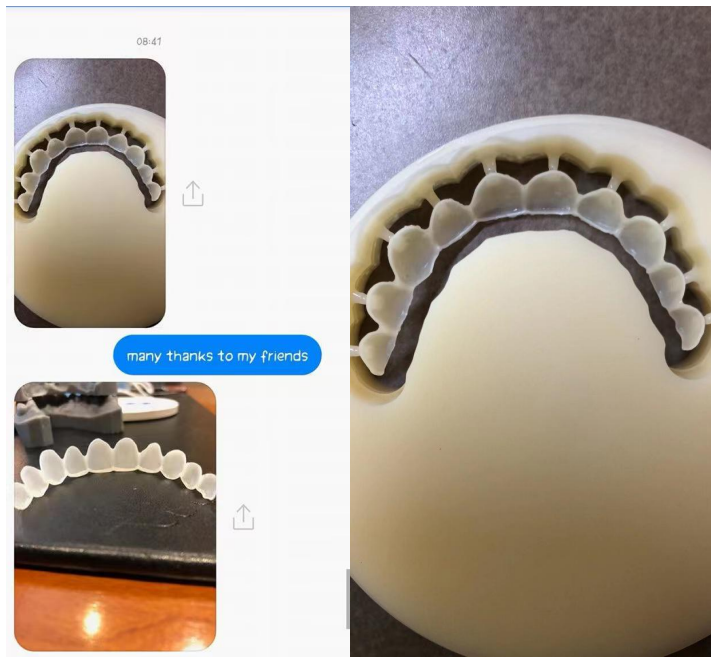

Density	1.35-1.45g/cm ³
Hardness	85-90 (Shore hardness)
Water Absorption	< 0.04%
Antistatic function	Available
Component	PMMA>99%; Pigment
Flexural strength	> 120Mpa
Solubility	<5µg/mm ³
Water uptake	<25µg/mm ³
Modulus of elasticity	>2200MP

Advantage:

1. Excellent abrasion resistance
2. Excellent finishing bright surface good polishing performance after milling
3. Excellent long-term shade stability and esthetics

Feedback:
